STEP 3 – Re-connect to Campus Wi-Fi (Windows XP)

1) Double click on the network icon highlighted below, located on the bottom left of the task bar/system tray.

2) Select the network GoToros-wpa2 and click Connect.

3) The connection will fail because it needs to verify your identity. Click on Change the order of preferred networks.
STEP 3 – Re-connect to Campus Wi-FI (Windows XP)

4) Select the network GoToros-wpa2 and click Properties.

5) Select the Authentication tab. Next to EAP type, select Protected EAP (PEAP). Uncheck Authenticate as computer when computer information is available. Click Properties.
STEP 3 – Re-connect to Campus Wi-Fi (Windows XP)

6) Uncheck **Validate server certificate**. Under **Select Authentication Method**, assure that **Secured password (EAP-MSCHAP v2)** is selected. Confirm that **Enable Fast Reconnect** is unchecked. Click **Configure**.

---

7) Uncheck **Automatically use my Windows logon name and password (and domain if any)**. Click OK.
STEP 3 – Re-connect to Campus Wi-Fi (Windows XP)

8) Click **OK** on the **Protected EAP Properties** window. Also click **OK** on the **Wireless Network Connection Properties** window and on any other windows if still opened.

9) If you successfully completed this process, an alert will display on the bottom left of the system tray. Click on the **Wireless Network Connection** pop-up to validate your credentials.

10) Enter your CSUDH username/password and click **OK**.
